

Master's Thesis

---

**Your title goes here**

---

Your Name

Examiner: Prof. Dr. Abhinav Valada

Advisers: Mr X, Dr. Y

Albert-Ludwigs-University Freiburg

Faculty of Engineering

Department of Computer Science

Robot Learning Lab

April 25<sup>th</sup>, 2021

**Writing Period**

01.12.2020 – 25.04.2021

**Examiner**

Prof. Dr. Abhinav Valada

**Second Examiner**

Prof. Dr. Thomas Brox

**Advisers**

Mr X, Dr. Y

# Declaration

I hereby declare, that I am the sole author and composer of my thesis and that no other sources or learning aids, other than those listed, have been used. Furthermore, I declare that I have acknowledged the work of others by providing detailed references of said work.

I hereby also declare, that my Thesis has not been prepared for another examination or assignment, either wholly or excerpts thereof.

# Abstract

# Acknowledgments

First and foremost, I would like to thank...

# Contents

## List of Figures

## List of Tables

# 1 Introduction

## 2 Background

Explain the math and notation.

## 3 Related Work

Give a brief overview of the work relevant for your thesis.

## 4 Approach

The approach usually starts with the problem definition and continues with what you have done. Try to give an intuition first and describe everything with words and then be more formal like ‘Let  $g$  be ...’.

### 4.1 Problem Definition

Start with a very short motivation why this is important. Then, as stated above, describe the problem with words before getting formal.

### 4.2 First Part of the Approach

### 4.3 N-th Part of the Approach

## 5 Datasets

## 6 Experimental Evaluation

## 7 Summary of Results

## 8 Conclusions and Future Work
