1 Introduction

2 Background

Explain the math and notation.

3 Related Work

Give a brief overview of the work relevant for your thesis.

4 Approach

The approach usually starts with the problem definition and continues with what you have done. Try to give an intuition first and describe everything with words and then be more formal like ‘Let g be ...’.

4.1 Problem Definition

Start with a very short motivation why this is important. Then, as stated above, describe the problem with words before getting formal.
